

YFM FUSION COMPANION

Illustrated User Guide

Yu-Gi-Oh! Forbidden Memories - Windows x64 companion

Manual fusion tools work without an emulator

Optional read-only live and save integration for NTSC-U RetroArch/SwanStation

Independent fan-made utility - no ROM, BIOS, save, or card artwork included

Install and start

Use the release ZIP - GitHub's source archive is for developers

Four steps

- Download the latest yfm_companion_windows_x64 release ZIP from the Releases page.
- Extract the entire ZIP. Never run the program from inside the ZIP preview.
- Run install_dependencies.cmd first. It checks Windows x64 and verifies that the executable and database stayed together.
- Start YFM Fusion Companion.exe. The bottom line should report 722 cards and 25,146 resolved fusion pairs.

What the dependency check means

- The portable program is self-contained. Ordinary users do not install .NET.
- RetroArch/SwanStation is optional. It is only needed for Live Duel and automatic save discovery.
- Windows 10 or 11 x64 is required. The release is not code-signed, so SmartScreen may appear.
- Developers can run install_dependencies.ps1 -InstallBuildTools to check or install the .NET 9 SDK.

Optional RetroArch setup

- RetroArch: Settings > Network > Network Commands = ON; Network Command Port = 55355.
- Leave Network RetroPad and stdin Commands OFF. Restart RetroArch once, then launch the NTSC-U game with SwanStation.
- The companion connects to 127.0.0.1 and sends read-only status and memory-read requests. Keep unsolicited inbound UDP 55355 blocked in Windows Firewall.

Interface map

The full window keeps source, display, troubleshooting, and workspace controls visible

- 4

Hand and player/opponent field tables.
- 5

Advice, deck, and collection subtabs.
- 6

Inspector opens only when requested.

Turn Adviser

Enter only cards that actually exist in the current hand and player field

Legal selection order

Inputs and controls

- Hand: up to five ordered cards.
- Monster Field and Spell/Trap Field: up to five optional positions each.
- Analyze Turn ranks legal routes by final ATK, then DEF.
- Tab accepts the top autocomplete result and moves to the next input.
- Empty slots are ignored; duplicate copies remain distinct by slot.

Rules the route obeys

- The field card, when used, interacts with the first selected hand card.
- Only one occupied field position may participate.
- Intermediate results continue through later hand cards in the displayed order.
- Non-fusions that merely discard a material are omitted.
- Compatible equips are terminal; their bonus cannot survive a later monster fusion.
- Documented glitches can be included or excluded explicitly.

Deck Analyzer

Every physical five-card hand is examined for a complete 40-card deck

DEAD HAND

9.36 %

General campaign safety (33 opponents; final gauntlet excluded) • Best found; not a proof of global optimality.

Counter coverage score: 1,780 across 198 concrete threats. This is a heuristic, not a duel-win probability. Final-gauntlet tie-break score: 1,003.

Virtual purchase plan: spend 70 of 70 saved Star Chips; 0 remain. Nothing written to the save. Password-redemption history is not stored by the game; any names entered above were excluded from this plan.

DECKOUTCOMESLIMITSLOW VALUESTAR CHIPSTHREATS

CARD	PASSWOR	QTY	EACH	TOTAL	SPENT	LEFT	WHY THIS PURCHASE
Arlownay	14708569	1	45	45	45	25	Adds a legal copy used by the resulti

Offline database ready • 722 cards • 25,146 resolved fusion pairs

- 1

Choose campaign scope, target duelist, profile, field, and types.
- 2

Enter or load owned quantities; visible rows match the calculation.
- 3

Saved Star Chips are optional and only create a virtual purchase plan.
- 4

Enter already redeemed password-card names so they are excluded.
- 5

Safety summary, exact hand metrics, purchases, threats, outcomes, limits, and exclusions explain the result.

Compact Live

A narrow right-side companion that leaves the central duel area visible

BEST LEGAL ROUTES

■

PI

5

L

RESULT	ATK	ROUTE
Twin-headed Th Dragon1	2800	1+2+3 O > F1 ✓ O > O F1 = F2?2
Pumpkin the King of Ghosts	1800	F(3)+23 C > O > F3? O > O > O F3?
Armored Zombie	1500	F(8)+44 O > C > — C > O > O —

1

Result name and effective ATK.

3

F(1)-F(5) are monster positions; F(6)-F(10) are spell/trap positions.

5

PIN stays above the game; FULL restores the normal window.

2

Hand routes use plain slot numbers.

4

Two guardian chains and F# outcomes stay beneath the route; ? means unknown.

Compatibility, privacy, and troubleshooting

Compatibility boundary

- Manual adviser, analyzer, and optimizer work from the bundled offline catalog.
- Live decoding and automatic discovery are validated for NTSC-U / SLUS-01411 in RetroArch/SwanStation.
- Other regions, revisions, emulators, cores, and modified games are not claimed compatible; use manual tools.
- RetroAchievements Hardcore Mode works because the companion never uses save states.

Read-only and private by design

- No game input, memory writes, save edits, config edits, telemetry, updater, ads, or online API.
- Local settings store window bounds, compact/topmost choices, and the last selected save path.
- Diagnostics are created only on request and exclude gameplay/card values.
- No ROM, BIOS, emulator, memory-card save, or copyrighted card artwork is distributed.

When something is unavailable

- ERROR or DISCONNECTED: confirm Network Commands, port 55355, firewall scope, SwanStation, and that RetroArch was restarted.
- NOT IN DUEL: connectivity is healthy; enter a duel. Stale duel structures are intentionally hidden in story mode.
- Save looks old: save in-game, close content so the emulator flushes the file, then Refresh Saved Snapshot.
- Wrong region/core: Live Duel may be rejected safely, but every manual feature remains available.
- For support, use Export Diagnostics; review the text yourself before sharing it.
